

TITLE 267 – NEBRASKA OIL AND GAS CONSERVATION COMMISSION

CHAPTER 3 – DRILLING, DEVELOPMENT, PRODUCING AND ABANDONMENT

017 MULTIPLE ZONE COMPLETIONS

The initial multiple zone completion of a well in a given field may be permitted by submitting an application therefore to the Commission and securing its order of approval thereof pursuant to an appropriate hearing. The application shall be accompanied by an exhibit showing the location of all wells on adjacent premises and all offset wells on adjoining lands and shall set forth all material facts involved and the manner and method of completion proposed. Thereafter, similar multiple zone completions in said field may be approved by the Director, if so authorized by the Commission, upon request therefore. Such requests shall also be accompanied by an affidavit showing that notice of intention to file such request has been given to the owners, as defined in the Act, of all tracts located within a radius of one-half (1/2) mile of the well in which the multiple zone completion is to be attempted. The Director may require such tests as he deems necessary to determine the effectiveness of the segregation of the different pools.
