

TITLE 267 – NEBRASKA OIL AND GAS CONSERVATION COMMISSION

CHAPTER 3 – DRILLING, DEVELOPMENT, PRODUCING AND ABANDONMENT

037 FORM 12 - REPORT OF PACKER LEAKAGE TEST

Operators of wells which are completed to produce oil and/or gas from two or more reservoirs through a common well bore, while segregating the production from each respective reservoir with a packer set in the well bore, shall conduct packer leakage tests immediately following the multiple completion of such wells and thereafter as the Director may require. The results of packer leakage tests shall be reported on Commission Form 12 within twenty (20) days following completion of the test.
